**Page limit:** The short project description should not be longer than 5 pages. All tables, figures, references, and any other element pertaining to this section must be included as an integral part of these sections and are thus counted against this page limit.

The page limit will be applied automatically. After the deadline, excess pages (in over-long proposals/applications) will be automatically made invisible and will not be taken into consideration by the evaluators.

The proposal is a self-contained document. **Links and hyperlinks are not allowed** and evaluators will be instructed to ignore any information that is specifically designed to expand the proposal, thus circumventing the page limit.

The following **formatting conditions** apply.

- *The reference font for the body text of proposals is Arial. The minimum font size allowed is 11 points. Standard character spacing and a minimum of single line spacing is to be used. This applies to the body text, including text in tables.*
- *Text elements other than the body text, such as headers, foot/end notes, captions, formula's, may deviate, but must be legible (**links and hyperlinks are not allowed**).*

- **A pre-proposal can be declared as ineligible if formatting conditions are not followed.**

**The project description should include the following elements:**

- *Fit to the scope to one priority area of the call;*
- *Scientific objectives and main research questions: demonstrate how the activity **advance the knowledge gaps** and the understanding of its field and/or across different fields;*
- *Short description of the theoretical framework, research questions, and hypothesis to be tested. Explain to what extent the proposed work is in adequacy with the addressed priority area of the call;*

- Explanation of the **novelty of the research** planned, the extent to which the proposed work is ambitious, contributes to scientific excellence and goes beyond the state of the art. - Explanation of the **soundness of the proposed methodology**, which includes the appropriate consideration of the ethical issues according to the EU "Do no significant harm" principle (DNSH);
- Explain to what extent your **plan of impact** is ambitious to solve the addressed problem. Does your proposed work have a strategic impact on reinforcing competitiveness and/or on solving societal or environmental problems at the European and international levels?
- Explanation of the suitability and quality of the measures to maximise expected outcomes and impacts (dissemination, exploitation, communication plan, ocean literacy);
- Added value of the European transnational cooperation and networking.
- **Stakeholders engagement** in the consortium (quadruple helix)
- Relevance for society and/ or policy and/or industry: explain to what extent your project could lead to novel / original contribution for tackling societal and/or policy and/or industrial challenges, including your approach/ambition towards stakeholder and/or end-user engagement to achieve the expected impact on society and/or policy and/or industry.
- **European sea-basins:** Which European sea-basins are covered by the pre-proposal? On which European sea-basins your project will have impact on? Explain how.

**It is requested to include a plan that describes what impact the research is expected to achieve in the long run and how it contributes to the overall impacts.** One way to make such a plan is to establish a methodology of Theory of Change

(ToC) with a related Impact Pathway (IP) to describe the research process, mentioning well-specified outputs and outcomes. Please refer to the Annex A of the call text: Theory of Change, for more information on how to set up a Theory of Change.

**Please be aware that pre-proposals will be evaluated based on their submitted content and written information only and strictly following the assessment criteria «Excellence» and «Impact» as defined in the call text.**

2. Fully self-financed Partners from any country who bring their own secured budget (designated Partner A, B).

### **Others Participants: Subcontractants**

Subcontractants are subject to the terms and conditions of each Funding Organisation and need to comply with their rules. Generally speaking, subcontracting is understood as the externalization of the execution of a (minor) project task that this Partner cannot execute.

Subcontractants of a Partner 1, 2...N are designated Subcontractant 1,2...N\_Partners 1, 2... N (e.g. Subcontractant 1\_Partners 1, is a subcontractant of Partner 1).

The Table below indicates the information that will have to be fill out by the Consortium Coordinator (Partner 1) and by all others Partners (2, 3, ...N).

Priority area 3: Planning and managing sea-uses at the regional level	
Priority area 4: Blue Bioresources	

### 4.3 Scientific Disciplines

Please indicate the scientific disciplines involved in your project.

<b>Scientific disciplines involved</b> <i>Please indicate the scientific disciplines mobilised in your project, depending on the expertise of the members of your consortium</i>
To be selected from a standardised list (available on the EPSS) – multiple choices

### 4.4 Sea-basins/ocean

Please indicate the sea-basins/ocean covered by your project.

<b>Sea-basins/ocean covered by the project</b> <i>(multiple choice option)</i>	
Mediterranean sea	
Black Sea	
Baltic Sea	
North Sea

## 4.5 Study areas/countries

**Study areas/countries covered by the project** (please do not indicate here the nationality of the members of the consortium but the areas and countries studied in your proposals (research scope, studied sites, etc.))

*(max 3,500 characters including spaces)*

## 4.6 Preliminary Data Management Information

*(max 2,500 characters including spaces)*

Please address the following questions:

- Who will be responsible for developing, implementing, overseeing, and updating the DMP (role, position, and institution)? For collaborative projects, explain the coordination of data management responsibilities across partners;

- What types of datasets of long-term value do you expect the project will produce or reuse?

“Long-term” means those data that will or may be of value to others within your research community and/or the wider research, innovation and stakeholder communities.

Data of long-term value should meet the FAIR principles; *i.e.* they should be findable, accessible, interoperable and reusable.

- How have you accounted for the costs required to manage the data and digital outputs to ensure long-term accessibility?

Please refer to the guidelines in Annex F – Open Access and Fair Data, of the Call text, for more information on how to establish a Data Management Plan and the principles of the Sustainable Blue Economy Partnership regarding data management.

## 5.0 COMPLIANCE WITH EU REQUIREMENTS

### 5.1 Do no significant harm principle<sup>18</sup>

Does your project comply with the "Do no significant harm principle"? YES / NO

Please specify: (Maximum number of characters allowed: 1000)

### 5.2 Compliance with EU Taxonomy<sup>19</sup>

- Describe how your proposal will make a substantial contribution to at least one of the six environmental objectives:

1. *Climate change mitigation*
2. *Climate change adaptation*
3. *The sustainable use and protection of water and marine resources*
4. *The transition to a circular economy*
5. *Pollution prevention and control* and 6. *The protection and restoration of biodiversity and ecosystems*

- Explain how your proposal do no significant harm (DNSH) to the other five objectives

---

<sup>18</sup> The Do no significant harm principle was introduced in the European Green Deal to ensure that the research and innovation activities do not make significant harm to any of the six following environmental objectives ([EU Taxonomy Regulation](#)): climate change mitigation, climate change adaptation, sustainable use & protection of water & marine resources, Pollution prevention & control, Transition to a circular economy and Protection and restoration of biodiversity & ecosystems. You can find more information on what is considered as doing significant harm to the above objectives in the following note: <https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/support/faq/15485>

<sup>19</sup>The EU Taxonomy Regulation adopted in June 2020 is a tool that will help investors, industry and researchers to navigate the transition to a sustainable economy by providing a science-based classification system to determine whether an economic activity is environmentally sustainable. [https://research-and-innovation.ec.europa.eu/news/all-research-and-innovation-news/research-and-innovation-heart-eu-taxonomy-2021-04-21\\_en](https://research-and-innovation.ec.europa.eu/news/all-research-and-innovation-news/research-and-innovation-heart-eu-taxonomy-2021-04-21_en) and [https://research-and-innovation.ec.europa.eu/system/files/2021-04/ec\\_rtd\\_research-innovation-eu-taxonomy.pdf](https://research-and-innovation.ec.europa.eu/system/files/2021-04/ec_rtd_research-innovation-eu-taxonomy.pdf)

- Explain how your proposal meet minimum social safeguards such as the OECD Guidelines on Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

## 6.0 BUDGET

NB: This part will have to be filled in directly in the EPSS.

!! Please note that you should indicate in this table an indicative repartition between the different categories of costs, the total budget / total costs of the project and the budget requested to your PFO for this 2024 Sustainable Blue Economy Partnership call. Please make sure to follow your Funding Organisations' rules. !! (see Annex B of the Call Text).

Please note that for each Partner you are requested to indicate both the total costs of the project and the requested funding budget:

- The total costs/expenses (column Total costs) comprise all the costs related to the project independently of national funding rules. You have to indicate here all the costs of the project (including personnel costs of permanent staff not eligible; etc.)

- Requested funding budget (column Funding request) comprises costs or expenses for personnel (including permanent salaries depending on Funding Organisations' rules), travelling, consumables, overheads (if fundable), subcontracts etc. that you will request to your Funding Organisation.

For requested funding budget, the cost calculation has to be based for each Partner on its Funding Organisations' rules; for questions, please contact National Contact Point of your Funding Organisation.

!! Please note that some Funding Organisations cannot provide 100% of eligible costs. Please make sure to follow your Funding Organisations' rules!!

**MANDATORY COSTS:**

The funded projects are considered to form part of an international research programme for which activities will be organised, namely a kick-off meeting, a mid-term meeting and a final meeting. These events will be possibly organised back-to-back with other workshops/events. The coordinators of funded projects should actively engage to these three joint activities. Accordingly, the cost for attendance to the physical meetings should be foreseen in their proposals' budget.

The indicated requested budget per Partner should be considered definitive, unless minor adjustment is requested by the Funding Organisations. Between pre-proposal and full proposal stage, change of budget can be allowed by the relevant Funding Organisation provided they are in line with the general rules of the call and the rules of the Funding Organisations. The Funding Organisation can decide according to its own rules whether it needs a justification.

Each Partner must report its own budget (including the subcontracting costs) as following:

**Example: Budget Table of Partner 1 (including budget of each subcontractant 1a, 1b...1n)**

<b>Partner 1 - Budget</b>	<b>Cost category</b>		<b>Total cost</b> <i>(in EURO, incl. VAT)</i>	<b>Funding request</b> <i>(in EURO, incl. VAT depending on rules<sup>20</sup>)</i>
